

Laboratory Notebook Check 1

Due: Wednesday, September 30 at 3:50 PM

Value: 30 points

Format: In-lab notebook audit

Purpose

Demonstrate that another scientist could reconstruct your microscopy and membrane-observation work from contemporaneous records.

Your task

- Flag entries for safety orientation, pipetting practice, microscopy calibration, plant-cell observation, and tonicity demonstration.
- For each entry, verify date, objective, procedure changes, raw observations, units, and initial interpretation.
- Add missing cross-references without rewriting original entries; corrections use a single line, initials, and date.
- Write a five-sentence audit note identifying one strength, one recurring gap, and a specific correction strategy.

Submit

- Physical notebook submitted during lab.
- One-page audit checklist placed inside the front cover.

Grading criteria

Criterion	Pts	Full-credit evidence
Traceability	8	Entries are dated, ordered, and linked to the correct activity.
Raw evidence	8	Observations, measurements, units, and anomalies are preserved.
Procedure record	6	Documents deviations and enough detail to reconstruct the work.
Interpretation	4	Separates observation from initial explanation.
Audit reflection	4	Identifies a concrete, realistic improvement.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
