

Laboratory Notebook Check 2

Due: Wednesday, November 4 at 3:50 PM Value: 30 points Format: In-lab notebook audit

Purpose

Show complete, traceable records for enzyme kinetics and cellular respiration investigations, including calculations and anomalies.

Your task

- Flag entries for enzyme pilot trials, pH series, spectrophotometer or gas collection setup, and respiration respirometers.
- Verify reagent concentrations, volumes, start/stop times, temperature, and instrument settings.
- Reconcile every excluded data point with a dated reason; never remove the original observation.
- Attach one annotated graph draft and explain how the notebook record supports each plotted value.

Submit

- Physical notebook submitted during lab.
- Annotated graph draft and signed audit checklist.

Grading criteria

Criterion	Pts	Full-credit evidence
Experimental detail	8	Records concentrations, volumes, timing, settings, and changes.
Raw data integrity	8	All trials and anomalies are retained and traceable.
Calculations	6	Formulas, units, and sample calculations are present.
Data-to-figure trace	4	Graph values can be traced to notebook entries.
Audit quality	4	Corrections and reflection are specific and transparent.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
