

Laboratory Notebook Check 3

Due: Wednesday, December 2 at 3:50 PM Value: 40 points Format: Comprehensive notebook audit

Purpose

Demonstrate a complete semester-long scientific record and show how raw observations support the final membrane-transport report.

Your task

- Complete the prior two audit corrections without removing or rewriting original entries.
- Flag gene-expression model work, membrane-transport pilot, sucrose series, and final data collection.
- Trace three final-report claims back to exact dated observations or calculations.
- Create an index of experiments, page numbers, digital-file names, and storage locations.
- Write a 250-word reflection on how your record-keeping changed and one practice you would carry into a research lab.

Submit

- Physical notebook with index and flags.
- One-page claim-to-evidence trace and 250-word reflection.

Grading criteria

Criterion	Pts	Full-credit evidence
Completeness	10	All required experiments and corrections are present.
Traceability	10	Claims and figures link to dated raw evidence and files.
Reproducibility	8	Procedures, settings, and deviations are sufficiently specific.
Data integrity	7	Corrections and exclusions are transparent and appropriate.
Index and reflection	5	Index is usable and reflection identifies meaningful growth.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
