

# Applied Cognition Note 4: Retrieval Practice

Due: Tuesday, October 20 at 11:59 PM

Value: 15 points

Format: 500-700 word analysis

## Purpose

Compare rereading with retrieval practice using a small, controlled self-study demonstration.

## Your task

- Select two equally difficult sets of six course terms. Study Set A by rereading for six minutes and Set B by closed-book retrieval plus feedback for six minutes.
- After a 24-hour delay, define all twelve terms without notes and score each response using the supplied 0-2 rubric.
- Calculate the mean score for each method and describe your confidence before and after the test.
- Explain the result using retrieval strength, feedback, and metacognitive fluency. Do not claim general effectiveness from one participant.

## Submit

- One PDF with materials, study record, delayed-test scores, and analysis.

## Grading criteria

| Criterion               | Pts | Full-credit evidence                                                         |
|-------------------------|-----|------------------------------------------------------------------------------|
| Accurate concept        | 4   | Uses the assigned cognitive concept accurately and precisely.                |
| Concrete evidence       | 4   | Documents specific observations or examples rather than general impressions. |
| Analysis                | 5   | Connects evidence to a defensible explanation and acknowledges a limitation. |
| Clarity and attribution | 2   | Meets length, organization, and citation expectations.                       |

## Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
