

Proposal Milestone 1: Question and Sources

Due: Thursday, October 29 at 11:59 PM

Value: 25 points

Format: Replication project milestone

Purpose

Define a narrow replication question and establish that it is grounded in credible cognitive psychology research.

Your task

- Choose one published effect covered in PSY 240 and write a one-sentence question naming the population, manipulation, and outcome.
- Identify one target study and two related peer-reviewed sources. At least one must be published within the last ten years.
- For each source, record the research question, sample, manipulation, outcome measure, central finding, and one limitation.
- Write a 200-word rationale explaining what the proposed replication preserves, changes, and could clarify.

Submit

- Two-page PDF containing the question, three-source table, and rationale.
- APA reference list with DOI or stable database link when available.

Important note

Do not propose deception, collection of sensitive information, or recruitment of minors or vulnerable populations.

Grading criteria

Criterion	Pts	Full-credit evidence
Research question	8	Specific, testable, ethical, and linked to course content.
Source quality	8	Three appropriate peer-reviewed sources with a clear target study.
Source synthesis	6	Accurately connects sources and identifies a meaningful limitation.
APA form	3	Complete, consistent references and required identifiers.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
