

Proposal Milestone 2: Evidence Table

Due: Thursday, November 12 at 11:59 PM Value: 50 points Format: Replication project milestone

Purpose

Build a transparent evidence base that supports design decisions in the replication proposal.

Your task

- Expand the bibliography to eight peer-reviewed sources, including the target study, two conceptual replications, one boundary-condition study, and one methods source.
- Create one row per source with sample, design, manipulation, outcome, effect direction, uncertainty, limitation, and relevance to your decision.
- Add a 300-word synthesis identifying one robust pattern, one disagreement, and one unresolved methodological issue.
- Mark any source you have only read as an abstract; abstract-only sources cannot support the final method.

Submit

- Landscape PDF evidence table plus synthesis.
- Reference list in APA style.

Grading criteria

Criterion	Pts	Full-credit evidence
Coverage and source quality	15	Eight relevant sources meet the required roles.
Extraction accuracy	15	Design and findings are represented accurately without causal overstatement.
Critical comparison	12	Limitations and uncertainty inform the proposed replication.
Synthesis	6	Identifies a coherent pattern, disagreement, and open issue.
Citation form	2	Complete and consistent references.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
