

Peer Review of Replication Proposal

Due: Tuesday, November 24 at 11:59 PM Value: 25 points Format: Structured peer review

Purpose

Provide actionable, evidence-based feedback that improves a classmate's proposal while preserving the author's ownership of the project.

Your task

- Read the proposal once for the overall claim, then again for evidence, method, and ethics.
- Write a 100-word neutral summary of what the study asks and how it would answer the question.
- Identify two strengths with page-specific evidence and three priority revisions, each explaining the risk and a feasible change.
- Audit alignment among question, manipulation, measure, and predicted inference using the supplied four-column matrix.
- End with two genuine questions rather than rewriting the proposal for the author.

Submit

- Completed review form shared with the author and uploaded privately to the portal.
- A 100-word reflection naming the most consequential issue you noticed in your own proposal.

Grading criteria

Criterion	Pts	Full-credit evidence
Accurate summary	4	Represents the project fairly and precisely.
Evidence-based strengths	4	Identifies two specific, meaningful strengths.
Priority revisions	9	Offers three actionable revisions tied to consequences.
Alignment and ethics audit	5	Checks the complete inference chain and participant protections.
Professionalism and reflection	3	Uses constructive language and completes the self-reflection.

Submission standards

Upload a readable PDF unless the handout specifies another format. Include your name, course code, and assignment title. Cite borrowed ideas and retain the editable source file. The learning portal timestamp is the official submission time.
